Update: Version 1.3 updated to Version 1.4

Affected pages: 152

Use the attached pages to update the affected document.

Read the case study, then answer the questions that follow.

Case study (questions 1–5)

Abdul works in a community services environment. Abdul’s manager Sonia has asked him to participate in a work safety inspection to assist with identifying common workplace hazards.

Sonia has provided Abdul with a work safety checklist and hazard reporting forms.

Abdul asked Sonia if he could have some support when completing the components of the assessment that involved infection control. Sonia arranged for Tahlia, the infection control nurse, to support Abdul with the identification of infection control hazards.

CS Question 1	What common workplace hazards should Abdul be aware of when completing his safety inspection?
Answer	
Marking	<input type="radio"/> Satisfactory <input type="radio"/> Unsatisfactory
